Summary

2+ years building production-grade enterprise financial applications using C#, .NET, Angular, and REST APIs. Skilled in scalable architecture design, performance optimization, and AI-driven workflow automation using Flowise and MCP.

Experience

Software Engineer

July 2024 – Present

Yardi Software India

Pune, India

- Developed and maintained core business logic for enterprise-scale AR and GL systems, resolving 150+ bugs to ensure data integrity, transactional consistency, and reliability.
- Implemented and optimized 50+ client-side screens in Angular (16–21), improving rendering performance by 50% and enhancing real-time UI configuration for enterprise clients.
- Refactored and optimized C#/.NET APIs to improve performance, maintainability, and data processing efficiency.
- Collaborated with three teams to design a unified, metadata-driven architecture that consolidated multiple domains, enabled dynamic UI configuration, and reduced feature development effort by 70–80%, cutting delivery time from days to hours.
- Built and configured MCP servers exposing internal APIs as standardized LLM-callable tools and integrated them with Flowise-based AI agents, enabling dynamic tool invocation, prompt engineering, and AI-driven workflow automation.

Software Developer Intern

February 2024 – June 2024

Yardi Software India

Pune, India

- Engineered client-facing configuration screens using Angular 16 and .NET, reducing setup time and enhancing usability within core product modules.
- Diagnosed and resolved 50+ bugs in Checkscan payment processing and validation workflows, improving reliability of financial transactions.

Backend Developer Intern

February 2023 – April 2023

Provoke Developers

Remote

- Architected and deployed 10+ RESTful APIs and client-side features using Node.js, Firebase, and Next.js, implementing authentication and authorization systems to secure user access and data.

Skills

Programming Languages: C#, JavaScript, TypeScript, Python, C++, C

Frameworks & Libraries: .NET, Angular (16–21), React.js, Next.js, Node.js, Express, Django

Databases & Tools : SQL, MongoDB, Firebase, Git, GitHub, Cursor AI, Flowise, MCP Endpoints, REST APIs

Projects

EasySplit — Full Stack AI Expense Splitting App | *React 19, Next.js 15, Tailwind CSS*

- Built a full-stack AI-powered expense-splitting app with user authentication, dynamic group management, automated reminders, and AI-driven insights using React 19, Next.js 15, and Tailwind CSS.

Hand Gesture Detection | *Python, NumPy, Matplotlib, TensorFlow, Google Colab*

- Trained an SSD MobileNet model using supervised learning to detect and localize predefined hand gestures within images, building a complete object detection pipeline using the TensorFlow API.

Education

Bachelor of Technology in Computer Science

Graduated: 2024

Government College of Engineering, Aurangabad (GECA)

CGPA: 9.01 / 10

Certifications & Achievements

- **Udemy:** Python for Data Science and Machine Learning Bootcamp
- Solved 700+ problems across LeetCode, GeeksforGeeks, and CodeChef
